Question		Answer	Marks	AO	Guidance
3	(a)	$[d^2 =](2 - -10)^2 + (-1 - 4)^2$ **oe** $[d =]13$	**M1** **A1** **[2]**	**1.1** **1.1**	May be implied by correct answer
3	(b)	$(x - 2)^2 + (y + 1)^2 = d^2$ $(x - 2)^2 + (y + 1)^2 = 169$	**M1** **A1FT** **[2]**	**1.1** **1.1**	Equation of the correct form. Allow one sign error within brackets. d^2must be positive. **FT** their d from part **(a)**
