Notes:			
(a) M1: Takes out factor x A1: Correct factorisation – allow $x(x + 5)(x + 5)$			
(b) M1: Correct shape			

(c)

M1: May be implied by one of the correct answers for a or by a statement

A1ft: Curve passes through the origin (0, 0) and touches at (-5, 0) – allow follow through

A1ft: ft from their cubic as long as it meets the x-axis only twice

from incorrect factorisation

A1ft: ft from their cubic as long as it meets the *x*-axis only twice
